Record high profitability boosted estimates

The Q3 report published by Alma Media yesterday was a little better than we expected as the higher-than-expected profitability pushed the Q3 result beyond our estimates. As a result, we made positive estimate changes to our result expectations for the next few years. Thanks to its excellent cash-flow performance, Alma Media's valuation will fall from its current high level to a justified level in the next few years, but in our view there is still no upside. Thus, we reiterate our Reduce recommendation but raise our target price to EUR 12.0 in line with the raised estimates (previously EUR 11.5).

Expected strong growth with better profitability than expected

Alma Media's 26% revenue growth in Q3 was well in line with our expectations, revenue from continuing operations increased supported by the Nettix acquisition and the recovery of the recruitment market. By segment, Career exceeded our estimates due to exceptionally strong demand for recruitment services. On the other hand, Talent was slightly below our expectations, which leveled out the Group-level growth picture. Growth in Consumer's revenue was well in line with our estimates. Alma's adjusted operating profit was EUR 17.8 million in Q3, exceeding both our and consensus estimates. In relative terms, profitability rose from the comparison period to a record level of 26.3% (Q3'20: 24.4%). The earnings overshoot was based on slightly better performance than expected in all segments. For Career, this was based on a volume level overrun, and in Talent and Consumer on better-than-expected relative profitability. In lower rows earnings were increased by the share of associated companies' earnings (Bolt). Against this background, the EPS of continuing operations of EUR 0.18 exceeded expectations more clearly than the operating result.

Changes in revenue focus boosted our profitability estimates for the next few years

Alma Media reiterated its guidance in the Q3 report, according to which the company estimates the revenue for the current year (2020: 230 MEUR) and adjusted operating profit (2020: 45.4 MEUR) to grow significantly from 2020. With the Q3 report, we made minor estimate changes to the revenue structure, but overall our growth estimate remained almost unchanged. Changes in the distribution of revenue increased our adjusted EBIT estimate for the next few years by 6-9%, despite small estimate hikes in the depreciation levels and Group costs for coming years. We expect the strong average revenue growth of 2021 to slow down in 2022-2024 to slightly below the company's target level without new acquisitions. By contrast, we expect Alma Media to clearly exceed the targeted 20% adjusted EBIT level also in the next few years and we wouldn't be surprised if the company would raise this target before long.

Expected return relies on dividend

We believe, the short-term earnings-based valuation of Alma Media's share is high (2021e P/E 20x and EV/EBIT 19x). However, thanks to the revenue growth we expect and, in particular, the strong cash-flow performance, that depresses the indebtedness of the balance sheet, the valuation will fall to a clearly more neutral level in the longer run, as the 2023e adjusted P/E will be 18x and the corresponding EV/EBIT 16x. However, thanks to the neutral longer-term valuation, the expected return for the next few years relies mainly on dividend yield, which we expect will be around 3% annually. In our view, this return expectation does not favor additional purchases, given certain cyclical aspects of the business, and the overall moderate risk level.

Guidance

(Unchanged)

In 2021, Alma Media expects revenue from continuing operations (2020: EUR 230 million) and adjusted operating profit (2020: EUR 45.4 million) to grow significantly from 2020.

Value drivers

- Strong and profitable growth in digital businesses
- Positive long-term market trends of marketplace businesses
- Stable profitability development and strong cash flow in media businesses
- M&A transaction option that is positive considering the track record

Risk factors

- High cyclicalities especially in advertising and recruitment
- Accelerated revolution in media and steep decrease in print media
- New technologies
- Changes in competitive position and dynamics
- Short-term uncertainty factors caused by COVID

Company reached record profitability in Q3

Revenue growth in line with our expectations

Alma Media's revenue increased by some 26% in Q3, which was well in line with our expectations. At segment level, our estimates were exceeded by Career, whose revenue increased by as much as 41% in Q3 (estimate: +30%) reflecting the exceptionally strong demand for recruitment services. Alma Media believes that this is partly due to the realization of the pent-up demand and partly to increasing competition for workforce in some of Career's operating countries. Talent's 8% growth was slightly below our estimates (estimate +17%), while Consumer's 39% revenue increase was well in line with our estimate (estimate: +40%).

Profitability at record level

Alma Media's adjusted EBIT margin was at a very good level in Q3 and hit the company's record at 26.3% (Q3'20: 24.5%). As a result, Alma Media's

adjusted operating profit was EUR 17.8 million in Q3, which exceeded both our and consensus estimates quite clearly. The better-than-expected operating result was explained by a slightly higher performance in all segments than we expected.

By segment, Career's profitability was well in line with our expectations and therefore the result exceeded our expectations reflecting the higher-than-expected volume level. Similarly, Talent's and Consumer's profitability exceeded our expectations in line with lower cost levels than expected. The company recorded roughly expected non-recurring items in its operating profit. On the lower lines, the company's result was boosted by a share of around EUR 0.7 million of associated companies' earnings, which we believe was mainly achieved by the holding in Bolt with an interesting longer-term potential and strong development during the summer season. Against this background, the reported EPS of EUR 0.18 from

continuing operations in Q3 exceeded estimates more clearly than the operating result.

Operating cash flow at a good level in Q3

Alma Media's Q3'21 operating cash flow reached EUR 18.6 million. In light of the low investment need, free cash flow in Q3 (incl. leasing payments) was EUR 16.2 million.

Alma Media's net debt fell to EUR 204 million (Q2'21: 222 MEUR) reflecting the record profitability and strong cash flow. As a result of the acquisitions made over the last year, the indebtedness of Alma Media's balance sheet has increased (equity ratio 33% and gearing 132%), and thus the leeway in the balance sheet is limited. However, it should be noted that due to the high profitability and strong cash flow performance, the balance sheet position is rapidly strengthening and gearing will quickly reach the comfort zone (2021e net debt/EBITDA 2.3x).

We primarily raised our profitability estimates for the next few years

Estimate changes 2021e-2023e

- Our Group-level revenue estimates for 2021-2023 remained almost unchanged after the Q3 report, but minor changes in focus in our estimates for the next few years led to a clear increase in our profitability estimates
- At segment level, we increased Career's revenue growth estimates, reflecting the strong drive of the recruitment market and the increased invoicing rate. By contrast, we slightly cut Talent's forecasts in terms of more conventional print media revenue, which we expect will not be entirely compensated for with digital revenue. Consumer's estimates remained practically unchanged despite minor changes in revenue distribution.
- Considering the changes in revenue focus (i.e. Career's high margin income vs. Talent's lower margin print income), our operating profit estimates for the next few years increased by 6-9% in total, despite small increases in depreciation and Group cost estimates.
- Our estimates are in line with the company's financial targets, as we expect the company's revenue to grow by some 4.5% per year on average in 2022-2024 excluding acquisitions, and profitability to exceed the target level (financial targets: growth +5% incl. acquisitions and adjusted EBIT above 20%)
- In terms of profitability, the company commented in connection with Q3 that the target is conservative and may be reviewed shortly

Operational result drivers 2021-2023e:

- After the strong revenue (~19%) and the adjusted EBIT (~43%) growth in 2021 the rate slows down clearly in our estimates in 2022-2023, as the market has recovered from the drop caused by the COVID pandemic and the effect of the Nettix acquisition fades away after Q1'22
- In our estimates for the next few years, profitability is pulled especially by improved sales distribution when the relative share of digital revenue increases
- We expect the company to achieve the EUR 1.5 million cost synergies from the Nettix acquisition by the end of 2022 in the Consumer segment
- We expect the growth from Talent's growing digital content, advertising and services to compensate for the impact of the decline in print media revenue and its profitability to remain at a good level
- We expect new growth investments to slightly limit the increase of relative profitability in Career

Expected return relies on dividend

Highish valuation will become neutralized in coming years

According to our Alma Media forecasts, the adjusted P/E multiple for 2021e is 20x and the corresponding adjusted EV/EBIT multiple is 19x. In our view, the earnings-based valuation multiples for the current year are quite high in absolute terms, which is emphasized in the EV-based multiple that takes account of the indebtedness in the balance sheet.

However, the estimated earnings growth and excellent cash flow will push the corresponding multiples to more moderate levels (2023e P/E and 17x and adj. EV/EBIT 16x) in coming years, when they will be slightly above the valuation level that the market has accepted for the company in the last few years. Given the increase of digital revenue with high profitability and strong cash flow (in particular marketplace businesses and digital advertising and services), we believe that the increase of Alma Media's acceptable valuation level in relation to historical valuation multiples is justified. We do not, however, see any upside in the earnings-based valuation over the next couple of years.

With our estimates, the share offers an average dividend yield of some 3% over the next few years. When the valuation is at a neutral level, the return expectation relies on the dividend, which is not in our opinion a justification for additional purchases.

Relative valuation level

In relative terms, the share's earnings-based valuation multiples aren't at a high level when benchmarked against the digital marketplace peer group. We believe this reflects the outlook of accelerated growth in digital services embedded in the valuation of these

peers and the extremely low interest rate outlook which the current rapid inflation growth challenges, however.

With the 2021-2022 EV/EBIT multiples, Alma Media has been valued at a 18-28% discount in relation to a wide peer group. With the corresponding P/E multiples, the discount is at a whopping 29-40%. In absolute terms, the platform companies in the extensive peer group are currently valued with extremely high multiples and we do not feel similar multiples should be accepted for Alma Media as it is not a purebred platform company and it is also clearly smaller than its peers.

Sum of the parts and cash flow model

We therefore believe that it is justified to value the company with a discount relative to its peers. In addition, the different growth and profitability prospects of the businesses and how these are linked to general economic and cyclical development must be considered. We also believe that these factors are reflected in the very fragmented valuation level of the peers. Thus, we use the peer group as a benchmark primarily in our sum-of-the-parts calculation where we, due to the aforementioned factors, apply a discount to Alma Media relative to the valuation multiples of the peers.

The value of our updated sum-of-the-parts calculation is EUR 14.5. Our sum of the parts model is described in more detail [in our extensive report](#). Similarly, with our DCF calculation, which reflects the longer-term potential, the share is valued at EUR 13.3 per share. However, we don't believe that these levels will be realized in the next 12 months.

Disclaimer and recommendation history

The information presented in Inderes reports is obtained from several different public sources that Inderes considers to be reliable. Inderes aims to use reliable and comprehensive information, but Inderes does not guarantee the accuracy of the presented information. Any opinions, estimates and forecasts represent the views of the authors. Inderes is not responsible for the content or accuracy of the presented information. Inderes and its employees are also not responsible for the financial outcomes of investment decisions made based on the reports or any direct or indirect damage caused by the use of the information. The information used in producing the reports may change quickly. Inderes makes no commitment to announcing any potential changes to the presented information and opinions.

The reports produced by Inderes are intended for informational use only. The reports should not be construed as offers or advice to buy, sell or subscribe investment products. Customers should also understand that past performance is not a guarantee of future results. When making investment decisions, customers must base their decisions on their own research and their estimates of the factors that influence the value of the investment and take into account their objectives and financial position and use advisors as necessary. Customers are responsible for their investment decisions and their financial outcomes.

Reports produced by Inderes may not be edited, copied or made available to others in their entirety, or in part, without Inderes' written consent. No part of this report, or the report as a whole, shall be transferred or shared in any form to the United States, Canada or Japan or the citizens of the aforementioned countries. The legislation of other countries may also lay down restrictions pertaining to the distribution of the information contained in this report. Any individuals who may be subject to such restrictions must take said restrictions into account.

Inderes issues target prices for the shares it follows. The recommendation methodology used by Inderes is based on the share's 12-month expected total shareholder return (including the share price and dividends) and takes into account Inderes' view of the risk associated with the expected returns. The recommendation policy consists of four tiers: Sell, Reduce, Accumulate and Buy. As a rule, Inderes' investment recommendations and target prices are reviewed at least 2–4 times per year in connection with the companies' interim reports, but the recommendations and target prices may also be changed at other times depending on the market conditions. The issued recommendations and target prices do not guarantee that the share price will develop in line with the estimate. Inderes primarily uses the following valuation methods in determining target prices and recommendations: Cash flow analysis (DCF), valuation multiples, peer group analysis and sum of parts analysis. The valuation methods and target price criteria used are always company-specific and they may vary significantly depending on the company and (or) industry.

Inderes' recommendation policy is based on the following distribution relative to the 12-month risk-adjusted expected total shareholder return.

Buy	The 12-month risk-adjusted expected shareholder return of the share is very attractive
Accumulate	The 12-month risk-adjusted expected shareholder return of the share is attractive
Reduce	The 12-month risk-adjusted expected shareholder return of the share is weak
Sell	The 12-month risk-adjusted expected shareholder return of the share is very weak

The assessment of the 12-month risk-adjusted expected total shareholder return based on the above-mentioned definitions is company-specific and subjective. Consequently, similar 12-month expected total shareholder returns between different shares may result in different recommendations, and the recommendations and 12-month expected total shareholder returns between different shares should not be compared with each other. The counterpart of the expected total shareholder return is Inderes' view of the risk taken by the investor, which varies considerably between companies and scenarios. Thus, a high expected total shareholder return does not necessarily lead to positive performance when the risks are exceptionally high and, correspondingly, a low expected total shareholder return does not necessarily lead to a negative recommendation if Inderes considers the risks to be moderate.

The analysts who produce Inderes' research and Inderes employees cannot have 1) shareholdings that exceed the threshold of significant financial gain or 2) shareholdings exceeding 1% in any company subject to Inderes' research activities. Inderes Oyj can only own shares in the target companies it follows to the extent shown in the company's model portfolio investing real funds. All of Inderes Oyj's shareholdings are presented in itemised form in the model portfolio. Inderes Oyj does not have other shareholdings in the target companies analysed. The remuneration of the analysts who produce the analysis are not directly or indirectly linked to the issued recommendation or views. Inderes Oyj does not have investment bank operations.

Inderes or its partners whose customer relationships may have a financial impact on Inderes may, in their business operations, seek assignments with various issuers with respect to services provided by Inderes or its partners. Thus, Inderes may be in a direct or indirect contractual relationship with an issuer that is the subject of research activities. Inderes and its partners may provide investor relations services to issuers. The aim of such services is to improve communication between the company and the capital markets. These services include the organisation of investor events, advisory services related to investor relations and the production of investor research reports.

More information about research disclaimers can be found at www.inderes.fi/research-disclaimer.

Inderes has made an agreement with the issuer and target of this report, which entails compiling a research report.
